OCS uses publicly available data from Home Health Compare and the CMS Cost Reports to create the HomeCare Elite list of agencies. Three domains of performance were cumulatively calculated—quality of care, quality improvement, and financial performance. The quality of care measure indexes agency performance in each of the 12 publicly reported Home Health Compare measures released in April 2010. The quality improvement index is based on changes in the 12 outcomes between data released in September 2009 and April 2010. The financial performance measure represents agency indexed profit margin from the 2009 CMS Cost Reports (or 2008 adjusted when 2009 data was not available).

Agency performance in each of the three domains was compared against the performance of other organizations in their state and in the country. The three domains were combined into one overall score, using a weighting methodology that gives the greatest importance to quality of care. The top 25% of agencies in each region, both facility-based and free-standing, were identified and added to the national list. Additionally, the top 100 and 500 agencies in the country were recognized based on overall score.
