

HOME BOUND HEALTHCARE OUTPATIENT THERAPY SERVICES

Our Outpatient Therapy Services offer a full range of advanced rehabilitative programs for adults 18 years and older at our facility. A comprehensive individualized treatment plan designed by our experienced multi-disciplinary team of comprised of licensed medical professionals will motivate and support patients to reach their optimal level of function and independence

REHABILITATIVE SERVICES

- Physical Therapy
- Occupational Therapy
- Speech Therapy

THERAPEUTIC MODALITIES

Our specialized treatment programs provide non-surgical, medication-free treatment options for a wide range of conditions. They have been developed around medical research using proven rehabilitation procedures. The programs may also use medical technology called “Therapeutic Modalities,” such as ultrasound, shortwave diathermy, gentle electrical stimulation or infrared light. Therapeutic Modalities are often used by professional sports teams to manage pain, re-educate muscles and increase circulation for improved healing after an injury.

INSURANCE COVERAGE

Physical, Occupational and Speech Therapy evaluation and treatment at Home Bound Healthcare Outpatient Therapy Services is offered for patients in an outpatient setting. We treat patients covered by Medicare, most health insurance plans and workers’ compensation. Because policies vary, please consult your specific plan for more details. We will work with your insurance company to determine and help you understand your benefits. We will inform you up-front of any out of pocket expenses that you will be obligated to pay.

OUTPATIENT THERAPY SERVICES

Home Bound Healthcare Outpatient Therapy Services give patients the therapy, education, and support they need to continue healing and enhance their mobility. Our goal is to deliver the finest care so that our patients can improve their quality of life and, to the greatest degree possible, return to their regular activities.

COMPLETE RANGE OF SERVICES

Physical and Occupational Therapies use many common treatment methods to help patients regain mobility and function. Physical Therapy is designed to treat individuals with limited mobility due to injury, surgery, aging or disease. The goal is to maximize function and comfort, provide emotional and psychological support and educate patients and their families.

Occupational Therapy uses purposeful activities to maximize independence and help patients get back to activities of daily living (ADLs) at home, at work and in the community. Occupational Therapists address specific functional needs such as bathing, toileting, dressing, cooking, eating, driving, leisure and recreational activities, and other tasks encountered in typical daily activities

PHYSICAL & OCCUPATIONAL THERAPY SERVICES

SPEECH-LANGUAGE THERAPY SERVICES

Speech-language pathology helps patients with impaired cognitive and linguistic abilities increase their verbal communication skills, understand what others are saying, and interpret and interact with the world around them. Eating and swallowing issues are also included in the speech-language pathology specialty.

- Articulation / Oral Motor / Speech Intelligibility Therapy
- Cognitive-Linguistic Therapy
- Dysphagia / Swallowing Therapy
- Voice Therapy
- Lee Silverman Voice Therapy (LSVT)
- Fluency Training
- Pragmatics
