

Home Bound Healthcare comes to Brown County

BY CHRISTA HALL

Home Bound Healthcare of Springfield expanded into Brown County in April, 2009.

The business, created by registered nurses Romy Macasaet and Julieta Mitra, incorporated 2004, and offers physical therapy, occupational therapy, speech therapy, skilled nursing service, social services and home health aides, according to Trish Gomez, Homebound Healthcare Marketing Specialist.

"The services were needed here, and in a rural area, the community deserves to have the kind of care in their homes that is available in big cities," she said.

The company has Joint Commission accreditation. The Joint Commission is an independent non-profit national accrediting body in the healthcare market-
